

IONIZING SMOKE ALARM MAIL BACK KITS

Curie offers mail back kits to facilitate recycling of ionizing smoke alarms called “CuriePack.” CuriePack kits include the outer fiber box packaging, inner poly accumulation container, packaging instructions, DOT markings, DOT function specific training acknowledgement and prepaid UPS ground shipping both ways. CuriePacks are designed for shipping $\leq 5 \mu\text{Ci}$ Am-241 smoke alarms which are the most common type. Smoke alarms with $>5 \mu\text{Ci}$ Am-241, Ni-63 and Ra-226 are acceptable but additional packaging requirements and costs will apply. CuriePacks are designed to qualify as a DOT strong tight package for shipping as: UN2911, Radioactive materials - excepted package, articles, 7. CuriePacks come in three convenient sizes as described below:

1 Gallon CuriePack

 Capacity for 4 – 5 intact smoke alarms. A convenient accumulation container for home owners, recycling centers and small businesses.

5 Gallon CuriePack

 Capacity for 25 to 30 intact smoke alarms. A convenient accumulation container for small businesses, e-waste facilities, mobile HHW events and permanent HHW collection facilities.

18 Gallon CuriePack

 Capacity for approximately 100 intact smoke alarms. A convenient accumulation container

for large businesses, e-waste processors, TSDs, large mobile HHW events and large permanent HHW collection facilities.
