

2025 Climate Leader Designation Worksheet Vernon

The following Sustainable CT actions are included in the Climate Leader Designation. Please indicate the year in which you completed the actions, and the points requested. If you are currently certified, you may count actions completed in your most recent certification report. If there are point discrepancies between certification years, Sustainable CT will count points previously awarded. Please note, if you are recertified in the year that you are also seeking the Climate Leader Designation, you may not include points earned in a prior certification cycle. You may also complete actions in the current certification year, whether or not you are currently certified. All new individual action submissions should be included in your standard Sustainable CT application in their relevant submission pages (marked “Completed”). You do not need to complete every action. You need to achieve 150 points from the actions below to be designated a Climate Leader.

In the “Year Approved or Submitted” field, please enter the year the action was approved (if previously approved in a past certification) or current year (if being submitted for the first time).

Action	Year Approved or Current Year	Approved Points
1.1 Optimize for Equity (10-50)*	2025	10
3.4.3 Develop an Open Space Plan (10)	2025	10
